# ON-LANE REDEMPTION BY QUBICAAMF

## ADD ENTERTAINMENT VALUE TO THE GAME AND ENCOURAGE ADDITIONAL GAMES AND REPEAT VISITS.

Redemption games are increasingly popular among today's youth and open play bowlers, and are shown to increase key areas of your business including party business and F&B sales, along with open play bowling.

The On-Lane Redemption System by QubicaAMF was designed to integrate with the Bowler Entertainment System and Conqueror Pro Management System, to provide a complete, customizable solution for managing your bowling center redemption activity.

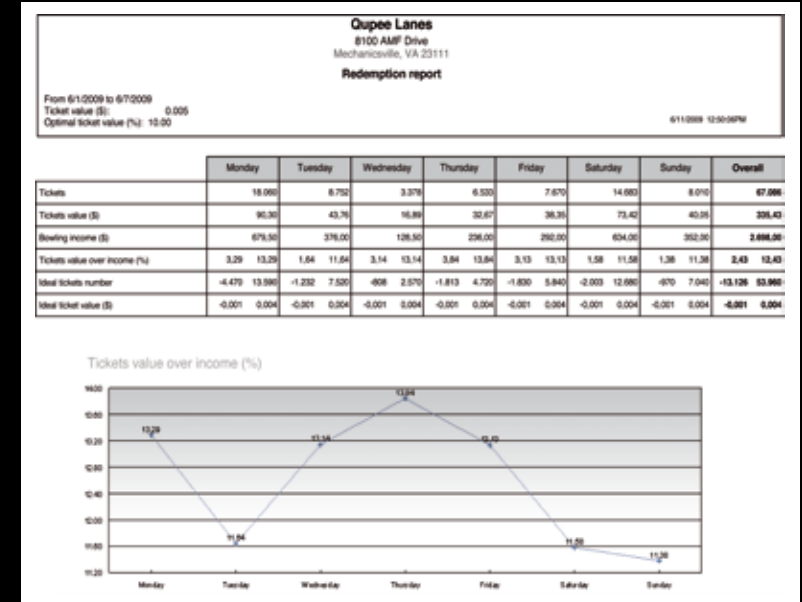

## FULLY INTEGRATED WITH THE BOWLER ENTERTAINMENT SYSTEM & CONQUEROR PRO.

- On Screen animations for tickets issued increase entertainment value.
- Recap screens showing the total tickets issued allows bowlers to check the tickets, collect and split after each game.
- Can be linked to BES Special Games to further promote redemption in your center (ex: Run the Lucky Train game every half an hour and set the prize for the winner to get 100 tickets if the train lands on their lane).
- Fully integrated with the Conqueror Pro Lanes Status so you can easily understand, in real-time, when something occurs on each ticket dispenser (tickets running out, ticket dispenser empty, etc.), and respond accordingly.
- Dispenser Warning Messages provide better and more effective customer service.
- Shift reports provide the payout information to show redemption profitability.
- Can be 'Enabled'/'Disabled' lane by lane.
- No need to physically access the dispenser for configuration.

## CUSTOMIZABLE TO MEET YOUR CENTER'S NEEDS

- Set Preferences - Customizable ticket issuing is linked to all bowling game events managed by a QubicaAMF system (ex: Strike, Spare, Converted Split, Strikes in a Row, Game Score and more). Possibility to configure ticket issuing based on customer type.
- Ticket Issuing Selection - Enable automatic ticket issuing for specific opening modes and time periods (ex: tickets disabled during leagues & glow bowling; tickets enabled during open play & birthday parties). Ability to enable/disable or change the set-up for the ticket issuing when opening a lane, or even when the lane is already open.

"In March of 2009, I installed the On-Lane Redemption System on 10 of my 20 lanes. In the first 2 months I registered a 10% increase in revenues over the same period prior year. My customers are requesting the 'redemption' lanes so much, that I have decided to extend it to the remaining 10 lanes."

Marco Raganini  
Sport Park, Fano (Italy)

**PLAYCITY**  
FAMILY ENTERTAINMENT CENTER

"We are experiencing great success with the new On-Lane Redemption System by QubicaAMF. It is directly benefiting our bowling segment, producing an increase in the number of games played. And, the system is easy for the center staff to manage."

Considering the results, we plan to install the On-Lane Redemption System in all of our existing and future centers, certain of the success that it will bring."

Michele Bragantini  
Managing Director  
FEC SpA - PLAYCITY (Italy)

- Full Payout Control: Ability to set the equivalent value for tickets. Ticket emitters on the lanes communicate the number of tickets issued for every session bowled to Conqueror Pro. Through a series of available reports you can see how many tickets were issued by period, and their value, see payout percent versus revenue and see revenue for bowling games with redemption by day or period.

## FULLY INTEGRATED WITH THE TROUBLE CALL SYSTEM\* (TCS).

- The mechanic and front desk operator are automatically notified if a problem occurs, or if tickets need to be reloaded.
- Down times are minimized.
- Problems are tracked and reported in TCS reports.
- Helps to provide better and more effective customer service.

\* Optional module.
